

OTOLARYNGOLOGY—HEAD & NECK SURGERY

Trillium Rotation Goals and Objectives (PGY-3)

The following is a list of goals and objectives which should be attained at the conclusion of the PGY-3 rotation at Trillium Hospital in Mississauga

Communicator

1. Present histories, physical findings, and management plans to consultants in an organized, efficient, and confident manner.
2. Prepare clear and concise notes, discharge summaries, operative reports, and present effectively in organized rounds and seminars.
3. Be able to discuss all common Otolaryngology procedures with patients and their families in a clear and understandable form, including risks/benefits, informed consent, and post-operative care.

Collaborator

1. Identify situations where consultation of other physicians or health care professionals is appropriate.
2. Demonstrate collegial and professional relationships with all co-workers and colleagues.
3. Recognize and respect the expertise and roles of allied health professionals such as speech language pathologists, audiologists, technicians, nurses, and clerical staff.

Manager

1. Keep an up-to-date log of surgical procedures and clinics attended on the POWER software.
2. Understand the importance of resource management, and utilize resources effectively to balance patient care duties, learning needs, educational/teaching responsibilities and outside activities.
3. Accurately identify criteria for patient admission to hospital in the urgent/emergent situation as well as the implications of such decisions.

Health Advocate

1. Recognize and respond to opportunities for advocacy within Otolaryngology, both for your patients as well as for the community in which we practice (e.g., smoking cessation, alcohol consumption)
2. Demonstrate familiarity with important determinants of health affecting head and neck surgery such as smoking and alcohol consumption

Scholar

2. Demonstrate the evolving commitment to life-long learning and evidence-based practices.

Professional

1. Deliver highest quality care with integrity, honesty, and compassion.
2. Practice medicine and Otolaryngology in an ethically responsible manner.
3. Recognize limitations, and seek assistance when necessary.

OTOLARYNGOLOGY—HEAD & NECK SURGERY

Trillium Rotation Goals and Objectives (PGY-3)

Medical Expert

SKILL		Achieved Satisfactorily (Y/N)
General Skills	1. Become an expert in the preoperative and postoperative management of patients who have undergone otolaryngology-head and neck surgery including office management.	
	2. Interpret diagnostic imaging of all head and neck sites.	
	3. Become familiar with the indications for common and advanced otolaryngology-head and neck surgical procedures as well as the risks and benefits for each.	
	4. Become competent in open biopsy of accessible head and neck lesions.	
	5. Perform open or percutaneous tracheotomies with assistance, requiring minimal guidance.	
	6. Perform effective anterior and posterior nasal packing for epistaxis.	
Neurotology & Otology	1. Take a relevant, appropriately-detailed history from a patient presenting for vestibular/dizzy assessment.	
	2. Perform a detailed, thorough examination of the vestibular system.	
	3. Be able to interpret conventional audiometry and tympanometry.	
	4. Accurately diagnose benign positional vertigo and demonstrate a rational approach to its treatment.	
	5. Perform EAC debridement	
	6. Perform myringotomy with ventilation tube insertion under supervision.	
General Head and Neck Surgery	1. Be able to perform fine needle aspiration of thyroid/neck mass, drainage of peritonsillar abscess, and thyroidectomy.	
	2. Be able to perform adeno-tonsillectomy with limited consultant intervention	
Head and Neck Oncology	1. Assess and stage malignancies of the head and neck.	
	2. Excise cutaneous lesions of the head and neck, including appropriate closure/reconstruction of the resulting defect (local and regional flaps).	
Laryngology	1. Diagnose basic pathology of the larynx.	
Rhinology	1. Diagnostic approach for and management of common sino-nasal lesions.	
	2. Perform biopsy of sino-nasal lesion.	
	3. Perform diagnostic nasal endoscopy (rigid and flexible) including preparation of the nose and accurate interpretation of findings	
	4. Develop an approach to the management of nasal obstruction, including the indications for surgery.	
	5. Develop an understanding of the indications and contraindications for endoscopic sinus surgery, and the associated risks and possible complications.
